

Purushottam Kumar Sahni

+91-7023942720 | sahni.purushottam14@gmail.com | [LinkedIn](#) | [GitHub](#)

— EDUCATION:

MBA in Agribusiness Management | Banaras Hindu University | 2022 |

— SKILLS:

Technical- | Excel/google spreadsheet | Power BI | Tableau | SQL | Python | MS Word | MS PowerPoint | Data Analysis | Looker studio | AWS |

Core- | leadership | Adaptable | Problem Solving | Team Management | Research | Flexible

— RELATED COURSES:

- Google Data Analysis Professional Certificate
- Data analysis by Microsoft & LinkedIn
- Prompt Engineering for ChatGPT

— WORK EXPERIENCES:

1. Marketing Research Intern | Ingemann Data A/S, Denmark | June – October 2021 | WFH |

- Conducted extensive research on Indian crop data, analysing the demand and supply dynamics across different regions. Provided valuable recommendations for agricultural projects initiated by the Government of India.
- Utilized MS Excel for efficient organization and evaluation of collected data.
- Enhanced understanding of the agricultural industry and developed skills in data analysis and research.

2. RAWE (Rural Agricultural Work Experience) | Kota Agriculture University | January - March 2019 |

- Led a 30-member team, assigning tasks and providing guidance for seamless operations. Prepared daily progress briefings and coordinated KVK training for local farmers and college students. Collaborated with ICAR scientists to conduct a valuable survey.
- Organized a successful farmers' fair, showcasing effective event management skills.
- Pursued training in Hydroponics, Mushroom Cultivation, Food Processing, and Azolla Cultivation, demonstrating a commitment to continuous learning and skill development in the agricultural industry.

— PROJECTS:

1. GEM Data Analyst | Google Custom Gemini for Data Analysis | [Project link](#)

- Proprietary AI tool achieving 98.5% accuracy in extracting key insights from complex datasets.
- Automates correlation, anomaly, and trend identification via advanced algorithms and NLP, delivering real-time data monitoring.
- Drives strategic decisions with precise forecasting and data-driven reports, improving processing efficiency by 20%.

2. Excel Dashboard | Excel | [Project link](#)

- Created an Excel dashboard to monitor sales performance in a coffee shop, utilizing pivot tables, charts, and conditional formatting to visualize key metrics.
- Analysed sales data to identify top-selling products, customer preferences, and sales trends, enabling effective inventory management and promotional strategies.

3. Weekly Credit Card Analysis Dashboard | Power BI, DAX, Power Query | [Project link](#)

- Created an interactive dashboard to analyse weekly credit card transactions, identifying trends in customer spending behaviour and payment patterns.
- Implemented advanced DAX measures and custom visuals to provide insights into credit utilization, payment habits, and potential fraud detection.

4. Maven UK Train Analysis Dashboard | Power BI, MySQL, DAX, Power Query | [Project link](#)

- Developed a Power BI dashboard to analyse UK train data, utilizing MySQL for data extraction and Power Query for data transformation, revealing insights into train performance, delays, and passenger satisfaction.
- Designed interactive visualizations, including trend analyses and heat maps, to help stakeholders optimize train operations and improve service quality.

5. Profit Analysis Dashboard | Google Spreadsheet, Looker Studio | [Project link](#)

- Conducted profit analysis by integrating data from multiple sources in Google Sheets and visualizing key financial metrics in Looker Studio, aiding in revenue optimization and cost management.

- Created dynamic dashboards that provided insights into product profitability, sales trends, and expense control, enabling data-driven financial decisions.

6. Healthcare Dashboard | Power BI, DAX, Power Query | [Project Link](#)

- Designed a comprehensive healthcare dashboard in Power BI to analyse patient data, including both inbound (hospital admissions) and outbound (doctor visits) metrics, providing actionable insights for healthcare providers.
- Integrated and modelled healthcare datasets, employing advanced DAX calculations to generate key performance indicators (KPIs) related to patient outcomes and resource utilization.

7. Olympic Games Data Analysis Dashboard | Power BI, Python, DAX, Power Query | [Project link](#)

- Built an Olympic Games dashboard in Power BI, integrating live data collected from Kaggle via a Python script, to provide real-time analysis of athlete performance, medal counts, and country rankings.
- Developed interactive visualizations and advanced DAX measures to allow users to drill down into data by sport, year, and country, offering deep insights into Olympic trends and outcomes.

— LEADERSHIP/ EXTRACURRICULAR ACTIVITIES:

- Accommodation head | XV Agricultural Science Congress & ASC EXPO 2021 | Banaras Hindu University | November 2021 |
- Displayed creativity and design skills by crafting a captivating Placement Brochure for the Master of Agribusiness Management Batch 2020-2022.
- Green club Head Dr K.N Modi University | September 2017- December 2018 |
- School Captain A.A.M Children's Academy | October 2013 – December 2014 |
- Successfully organized the prestigious "National Sports Meets UTOPIA" event at Dr. K.N Modi University in 2017, leaving a lasting impact on participants.

— AWARDS:

- Won the intercollege basketball competition at the Institute of Agriculture Sciences, Banaras Hindu University in 2022.
- Earned sixth place in a photography contest held by the Delhi School of Photography and received a laptop as an award in 2020.
- Secured the second position in the Environmental Model Competition in 2012.
- Won the first position in the interschool Science Exhibition in 2010
